

Hacker Industries, Inc. FIRM-FILL® 4010 Project References

FIRM-FILL® 4010 is a cementitious floor underlayment from Hacker Industries, Inc. designed for thin capping concrete in new construction or renovation projects with no shot blasting required. Installed from featheredge to 2", fast-drying FIRM-FILL® 4010 poured over existing concrete, precast, or damaged or cracked lightweight concrete provides a strong, flat surface for finished floor coverings. Below is a small sample of projects that have utilized FIRM-FILL® 4010.
