

PROJECT REFERENCES

Designed for use in multi-family, commercial and institutional buildings with light-gauge steel framing and a corrugated steel deck, FIRM-FILL® CMD is a lightweight, high-strength gypsum concrete floor underlayment. Installed at 1" above the top of the flutes (1-9/16" total), FIRM-FILL® CMD reduces dead loads and thickness, significantly lowering costs. Below is a small sample of projects that have utilized FIRM-FILL® CMD.

Contractor: Canan-Titan Joint Venture

Project: Fort Riley, Building 216
Location: Fort Riley, Kansas
Description: 4,782 ft² of FIRM-FILL® CMD

Contractor: CBS Construction
