

PROJECT REFERENCES

FIRM-FILL® Gypsum Concrete, "Super Blue" underlayment introduced by Hacker Industries, Inc. in 1983 and since improved with new technology, is designed to achieve the ultimate sound control and fire resistance in multi-family housing. With over 105 UL fire rated design listings and exceptional STC and IIC ratings, FIRM-FILL® Gypsum Concrete is an excellent choice for jobs needing compressive strengths up to 2200 psi. Below is a small sample of projects that have utilized FIRM-FILL® Gypsum Concrete.
