

Hacker Industries, Inc.

Hacker Industries, Inc. was established upon the simple belief that when given a choice of floor underlayments, the building community would choose the product of greater value. Our mission statement has formed the foundation of a growing business for more than 29 years. It sets the standard in the decisions we make in suppliers, applicators and employees. Our consistent commitment to supply extraordinary value through the highest quality floor underlayments and sound control mats installed by the best Licensed Applicators remains solid and unchanged.

Since 1983, Hacker Floor Underlayments have been installed in a multitude of structures, in a wide variety of applications. They provide the sound resistance that is vital to comfortable living in multi-family projects; are an integral part of one to four-hour fire ratings in an apartment or office building; act as an effective thermal mass for radiant heating floor systems and furnish a level, solid surface for floor coverings. With over 100 Underwriters Laboratories listings, and approvals from ICC-ES and HUD, our products meet demanding project specifications and exceed the expectations of any construction project. All Hacker Floor Underlayments meet ASTM F2419, Standard Practice for Installation of Thick Poured Gypsum Concrete Underlayments and the Preparation of the Surface to Receive Resilient Floor Coverings and installation methods listed by the Tile Council of America.

Hacker Industries, Inc. also provides an innovative line of sound attenuation mats, which are used to aid in the reduction of sound between stacked residential units. Hacker Industries, Inc. does not sell its products directly to the general public. Rather, it provides distribution through a network of trained, Licensed Applicators across North America. This ensures that the end user will have the highest quality floor underlayment and sound control mat available in the market today.

Quality is not only a final objective but a process requiring constant refinement and renewed commitment. Hacker Industries, Inc. implements this belief by continuing to refine our application methods, improve upon our installation equipment and expand and further develop our product lines. Let Our Products Floor You®.
