R.J. Fritz's Log Cabin Fredric, WI

Imagine living in a rustic log cabin on a lake in Fredric, Wisconsin, with the freezing winter snow blowing furiously outside. Visualize sitting inside, book in hand, bare feet resting on the warm floor. This picture is a reality for Minnesota WCCO Channel 4 sportscaster, R.J. Fritz and his wife Deb. They designed this dream cabin, and made it a reality with the help of **KMAC, Inc.**, a Licensed Applicator of Firm-Fill® Floor Underlayments.

KMAC, Inc. of Hutchinson, Minnesota, installed 2600 square feet of **GYP-SPAN®** Radiant in the nine room log cabin. GYP-SPAN® Radiant, a gypsum concrete floor underlayment specifically designed for use with radiant heating systems, is ideal over radiant heating tubes for uniform heat transfer, and is superior as a crack-free thermal mass. KMAC, Inc. was chosen for this project because of their reputation for quality work, recognized by the heating contractor, Bruce Wickstrom of Earth Energy Systems of Siren, Wisconsin.

The KMAC, Inc. crew was videotaped during the installation as a part of the cabin building process, which was aired on R.J. Fritz's show "Out and Out." According to Scott Ryan of KMAC, Inc., "R.J. loves the floor, and the completed cabin will be a beautiful sight when the leaves start changing."

Another benefit of GYP-SPAN® Radiant is the ability to utilize it in "Green" construction as a contribution to a healthy indoor atmosphere. GYP-SPAN® Radiant is inorganic, so it is not conducive to the growth of mold, it spreads heat evenly without circulating dust and pollens throughout the air and it is made primarily of gypsum, a natural mineral that occurs abundantly in many areas of the world.

Hacker Industries, Inc. supplies an entire line of Firm-Fill® gypsum concrete floor underlayments that possess superior strength and ultimate sound control, with PSI strengths ranging from 1200 to over 5500. With over 105 Underwriters Laboratories listings, and ratings from ICBO, BOCA, SBCCI, and HUD, Firm-Fill®

Floor Underlayments are ideal for not only new construction, but also for renovation and repair.

Job Highlights	
Owner:	R.J. and Deb Fritz
Applicator:	KMAC, Inc.
Project:	Log Cabin Residence
Assembly:	Plywood
Application:	Gyp-Span® Radiant
Square Feet Installed:	2,600
