The Trump National Doral in Miami, Florida

The Trump National Doral in Miami, one of the newest additions to the Trump Hotel Collection's line of exquisite five-star hotels, is currently undergoing a multimillion-dollar renovation to restore the property to its former grandeur. Located on a sprawling 800-acres, this resort's renovation started with the ballrooms and resort clubhouse, which include several dinner venues, retail shops and guest accommodations. The resort will remain open during the makeover, which is expected to conclude in Fall 2014.

Job Highlights

General Contractor:	On-D Level Underlayments, LLC Miami Springs, Florida
Project:	Trump National Doral Miami, Florida
Assembly:	Uneven concrete and existing tile
Application:	FIRM-FILL® Gypsum Concrete
Square Ft:	21,059 sq.ft.-FIRM-FILL® Gypsum Concrete
Applicator:	On D Level Floor Underlayments, LLC. Miami Springs, Florida

ON D LEVEL Floor Underlayments, LLC worked with T&G Constructors, Inc. on the renovation of the Trump National Doral resort's clubhouse and ballrooms. On D Level is a Hacker Industries, Inc. Licensed Applicator that has been trained to use Hacker Floor Underlayments and sound control products. The renovation of the ballrooms and clubhouse were a challenge because a cavity in the floor made it necessary to level out a 4" slope within a 20' area. On D Level's work on this project was highly successful.

They believe the materials used are unrivaled in quality and consistency. On D Level serves all of Southern Florida and is committed to going beyond their customer's expectations.

T&G Constructors, Inc., located in Miami, Florida, has worked on close to \$1 billion in renovations as well as new construction projects. Their business provides services from planning and conceptual design through final completion. With offices in Dallas, Miami and Orlando, they are licensed in 23 states and serve clients throughout the United States.

On D Level used Hacker Industries, Inc.'s original FIRM-FILL® Gypsum Concrete floor underlayment, which is designed for use in multi-family housing to satisfy acoustical ratings and fire codes. With excellent STC and IIC ratings as well as over 100 UL listings, FIRM-FILL® Gypsum Concrete floor underlayment is an excellent choice for jobs needing compressive strengths up to 2000 psi.

Hacker Industries, Inc. was established upon the simple belief that when given a choice of floor underlayments, the building community would choose the product of greater value. Hacker Floor Underlayments and sound control mats are listed in over 100 UL floor/ceiling assembly systems designed to achieve excellent STC and IIC sound ratings. With over three billion square feet installed since 1983, Hacker Floor Underlayments are the proven choice to provide a durable, flat floor surface ideal for virtually any finished floor covering.
